# ***Item 001018-03***

---

- **Item 001018-03 Description: NSLC N65 to develop 3-M up-line data tracking system**
- **History**
  - ✓ Needed a way to track OMMS-NG Parts data submissions.
  - ✓ Temporary solution was to post Excel files with tracking information on Navy Ship Material Condition Metrics web site.
    - Excel files organized by TYCOM and ship UIC
    - Example on next slide
  - ✓ This solution had several drawbacks:
    - Very labor intensive (the Excel file was typed by hand)
    - Not flexible (Excel file is only format, difficult to sort or rearrange)

# ***Item 001018-03***

---

- **Redesigned front end processing went into production Oct 2002**
  - ✓ Replaces Excel file with OARS report S5030
    - Example on next slide
    - User selectable criteria, including date ranges, TYCOM, ship UIC
    - Report can be sorted, filtered
    - Report data can be saved to other file formats
  - ✓ New process is automated
  - ✓ New process is Oracle based, on Ships' 3-M Server
- **Additional reports could be developed from the same underlying Oracle based tracking data**
  - ✓ Send suggestions to us

# ***Regular 3-M Submissions***

---

- **Not directly related to item 001018-03, but...**
- **The new front end processing also applies to tracking of regular 3-M submissions**
  - ✓ OARS report S5029 is available to show tracking of these submissions
  - ✓ Example on next slide
  - ✓ This report replaces a hard copy, mainframe generated report that was mailed to selected users. They are being notified by letter of the new report.
- **Additional reports being developed**
